

# Order form 2011

120 pages, April 2009  
 Paperback, 16.5 x 23.5 cm  
 Regular price: 295 Euros, plus 7% VAT  
 (transportation costs are included)  
 ISBN: 978-3-00-026707-9

## Organic Aquaculture 2009 – Production and Markets

presents a global inventory on organic aquaculture production, market development and regulations on organic aquaculture.

The publication looks back at the development of organic aquaculture production and identifies and describes important issues with regard to standards and laws.

It also offers a statistical database on worldwide production and markets, ongoing research and development, and on the perspectives for developing countries, which are major players in conventional and organic aquaculture.

In addition, it gives a comprehensive and easy overview of the status quo of organic aquaculture, upcoming developments and trends, challenges and perspectives, chances and constraints.

The book is meant as a tool for decision-makers in the aquaculture industry, as well as for private certification and labelling organizations, governmental organizations, development agencies and international organizations.

The study is based on data collected through in-depth-interviews with experts, desk top studies and standardized questionnaires analysed within a cooperation project of Organic Services GmbH und Naturland e.V.
