

# Quality assurance in organic agriculture through improved cooperation between trade and certification: A new approach

Josef Ritt

Division Manager Department Processing  
Austria Bio Garantie

Heidi Kottinig

General Manager  
ARGE Bio-Regionen Austria

## Who we are

### ARGE BIO-REGIONEN Österreich

- Platform for organic producers, wholesalers and processors
- Aims to support organic farming
- Wants to assure product safety throughout the whole food chain
- Links up the organic sector with retail chains
- Works closely with organic Certifications Bodies (CB)

### Austria Bio Garantie

- Austria`s biggest organic CB
- More than 14.000 clients
- Offers high quality inspection services

## How we cooperate

- Exchange of certification data and data of flows of goods between the CB and the platform of organic producers
- Release of delivered goods by the certification body

## Reasons for cooperation

- Increasing product safety and avoiding fraud by linking up all levels
- Permanent monitoring instead of point in time inspection
- Access to up-to-date data
- Traceability across the whole supply chain
- Quick reaction in case of certification denials
- Concentration on risk management rather than on multiple data recording
- Easier access to sales channels

**System compares with contracted quantities.  
Automatic alert if over-delivery occurs.**

# Batch tracing

Exact tracking of each batch

## Advantages of the cooperation

- ✓ Release of products by the CB avoids uncertified goods in supply chain
- ✓ Permanent feedback about actual movements of quantities within the network to the CB facilitates planning
- ✓ Automatic checks of plausibility of delivered quantities with feedback to CB
- ✓ Automatically generated alerts allow quick action of the CB
- ✓ Compliance with traceability requirements (upstream and downstream)
- ✓ Improved position when bargaining with buyers
- ✓ Strengthened market position
